

# Welcome to the CircularBio Innovations!

**Dates: 21.3. – 15.5.2022 | Place: Online | Registration by: 18.3.2022**

**Contact: Kaija Saramäki, [kaija.saramaki@karelia.fi](mailto:kaija.saramaki@karelia.fi) | Scope: 5 credit units**

## FOR WHOM?

The training is intended for students from all disciplines and staff members of companies, associations, cooperatives and freelancers as well as other industries that are interested in cooperating and developing the bio- and circular economy in their respective fields.

## WHY?

After the course, you will be able to innovate, develop and discover solutions to the company's bio- and circular economy challenges in cross-cutting sectors groups and make use of the tools of bio- and circular economy development and methods as part of the innovation process. You will also have a basic understanding of service/product design and commercialisation.

## HOW?

The course consists of lectures, participation in the CircularBio Innovations Hackathon and group work. The lecture topics include circular economy, service design, commercialisation, innovations and more.

The Hackathon part of the course is implemented as an eight-day event 4.-11.4.2022 with lectures, coaching and group work between 15:00 and 18:00 (EEST), also during the weekend. You will receive coaching and guidance throughout the process from our working life partners and staff members from the organising universities and our partner universities.
